

How to fold your DUI drysuit into your DUI drysuit bag

*See reverse side for
folding illustrations*

- (A) Lay the drysuit face down on a clean, flat surface with arms out to the side
- (B) Fold legs up so that the toes of the drysuit go just beyond the shoulder line
- (C) Fold bottom portion of the drysuit toward the upper portion, making approximately a 12 inch folded section
- (D) Fold once more so that bottom of the last fold now rests at about the shoulder line
- (E) Tuck seals into the sleeves and fold sleeves across the entire package. Slide folded drysuit into the DUI drysuit bag

Note: Lubricate the zipper after each dive with Zipper-Ease. Be sure to rinse your drysuit with fresh water (both inside and out, if necessary) and dry thoroughly before placing it in the bag for storage.
